one of the lowest in lower mainland

Paper Type:

We have different types of paper: regular, semi gloss, fabric, vinyl.

Semi gloss paper premium 80 lb is recommended where high quality and durability matters.

Due to the thickness (semi card stock) and coated material, images/graphs and colors look nice and shiny at the highest quality.

Regular paper is recommended where budget matters the most and poster is mainly text without colorful background or images/graphs.

Fabric is used for flight trips as they are foldable and will fit into your suitcase. Printing quality is similar to regular paper.

Vinyl banner most common use is for the promotion of brands, events, products, websites, ... They are waterproof and suitable for outdoor.
